

Southern Wall Products, Inc. is committed to producing the highest quality and most environment-friendly building products on the market. We have tested our formulas with Materials Analytical Services, Inc. (MAS), an independent third-party laboratory, to ensure that the formulas meet and exceed current environmental standards.

MAS Certified Green is an independent emissions testing program that certifies low-emitting interior products and building materials to relevant regulatory and industry emission standards. This program helps specifiers, designers, architects, builders, consumers, and other end users easily identify "green" products. These products must meet the most stringent indoor air quality guidelines for use in "green" buildings. The MAS Certified Green program ensures that the short and long-term Volatile Organic Compound (VOC) emissions from Ruco products are minimal and do not adversely affect indoor air quality.

USGBC LEED Credit Reference Chart

Product	EQ Credits 4.1 and 4.2 (1) Low-Emitting Materials	MR Credits 4.1 and 4.2		MR 5.1 and 5.2 Regional Materials
		Post Consumer Recycled Content	Pre-Consumer Recycled Content	
Ruco Sure Sand Set Type Joint Compounds Sure Sand 5, 20, 45, 90, 120, 210, 300	- VOC Content is less than 2 grams per liter. - Independently Certified by MAS, Inc. as an Ultra-low VOC Emitting Product. - Passes CHPS performance standard - Conforms with CDHS Section 01350 criteria for emissions limits set for schools and office buildings.*	0%	0%	Manufactured in Tucker, GA, USA
Ruco Ready Mixed Joint Compounds All Purpose Lightweight Machine Grade Middleweight	- VOC Content is less than 2 grams per liter. - Independently Certified by MAS, Inc. as an Ultra-low VOC Emitting Product. - Passes CHPS performance standard - Conforms with CDHS Section 01350 criteria for emissions limits set for schools and office buildings.*	0%	0%	Manufactured in Tucker, GA, USA
RucoCoat Equalizer Plus	- VOC Content is less than 5 grams per liter. - Independently Certified by MAS, Inc. as an Ultra-low VOC Emitting Product. - Passes CHPS performance standard - Conforms with CDHS Section 01350 criteria for emissions limits set for schools.*	0%	0%	Manufactured in Tucker, GA, USA
RucoCoat Equalizer	- VOC Content is less than 25 grams per liter.	0%	0%	Manufactured in Tucker, GA, USA
Ruco Design Texture	- VOC Content is zero.**	0%	0%	Manufactured in Tucker, GA, USA
Ruco Styrene Aggregated Textures Fine Fine Round Medium Coarse	- VOC Content is zero.**	0%	0%	Manufactured in Tucker, GA, USA
Ruco Paper Tape	- VOC Content is zero.**	0%	0%	Manufactured in Rensselaer, IN, USA

* Materials Analytical Services, Inc. tested and concluded that Ruco Ready Mixed Joint Compound, Ruco Sure Sand, and RuCoat Equalizer Plus are in compliance with California Department of Health Services section 01350.

**RuCo Design Texture, Ruco Styrene Aggregated Textures, and Ruco Paper Tape have zero VOC by content.
